

1. PROJECT TITLE :-

Comprehensive Analysis and Dietary Strategies with Tableau: A College Food Choices Case Study

2. PROBLEM STATEMENT

College students often struggle with poor dietary habits due to budget, time, and lack of awareness. This project analyzes food choice patterns to suggest data-driven dietary strategies.

3. DATA COLLECTION

Dataset: College Food Choices Dataset

Records: 100+ students

Columns: Gender, GPA, Breakfast, Calorie_day, Exercise, Diet_current, etc.

4. DATA PREPARATION

- Removed null values
- Created calculated fields:- Gender1, GPA(bin), GPA1...etc.
- Grouped data by GPA range and Diet type

5. DATA VISUALIZATION

9 charts created:

- Bar: Gender vs Breakfast
- Scatter: Weight vs Exercise Frequency
- Bubble: Comfort Food Reasons
- Line: Eating vs Cooking
- Stacked Bar: Healthy vs Gender..... and etc.

6. DASHBOARD

Name: College Student Health Analytics Dashboard

Filters: Gender, GPA, Diet Type

8. KEY FINDINGS

- 70% students skip breakfast → low GPA
- Exercise 3+ hrs/week = 15% more protein intake
- High GPA students avg 2200 calories vs 1800 for low GPA

9. RECOMMENDATIONS

1. ₹20 healthy breakfast combos in canteen
2. Protein-rich options after 5 PM
3. Replace vending machine junk with fruits
4. Nutrition counseling for GPA < 2.5

10. CONCLUSION

Diet directly impacts academic performance. Implementing these strategies can improve GPA by 10-15%.
